TUSHAR KUMAR SWAMI

SOC Analyst | Cybersecurity

9310020457 | tusharswami2004@gmail.com | New Delhi, India

LinkedIn| Web Portfolio

PROFESSIONAL SUMMARY

Entry-level SOC Analyst with hands-on experience in real-time security monitoring using Splunk SIEM. Skilled in analyzing Windows Event Logs, identifying brute-force attacks, monitoring authentication activity, and escalating security incidents. Practical exposure to Active Directory security, log correlation, alert triage, and MITRE ATT&CK mapping. Strong understanding of SOC workflows, incident response lifecycle, and L1 monitoring responsibilities.

TECHNICAL SKILLS

SIEM & Monitoring: Splunk (SPL queries, dashboards, alert tuning), Log Analysis, Windows Event Log Monitoring, SIEM Alert Triage

Incident Response: SOC Tier 1 Operations, Alert Validation, Incident Identification & Escalation, Threat Documentation, Playbook Execution

Threat Detection & Analysis: MITRE ATT&CK Mapping, Brute-Force Detection, Log Correlation, Vulnerability Assessment, Basic Threat Hunting, IDS/IPS Concepts

Security Tools: Kali Linux, Nmap, Hydra, Wireshark, Burp Suite, Metasploit (basic), VirtualBox

Identity & Access Management: Active Directory, Windows Server, Authentication Event Monitoring, IAM Principles, ISO 27001 Basics

Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, VPN, Ports & Protocols, Network Security Monitoring

Programming: Python (scripting & automation), Bash Scripting, C/C++, HTML

PROJECTS

Real-Time Cyber Attack Detection using Splunk SIEM | *Personal Lab* | 2024

- Designed and deployed a Splunk SIEM environment on Ubuntu Server to simulate and detect real-world cyber attack scenarios including brute-force, unauthorized access, and lateral movement.
- Developed custom SPL (Search Processing Language) queries to identify abnormal login patterns, failed authentication spikes (Event ID 4625), and suspicious network activity.
- Built 5 real-time monitoring dashboards improving security event visibility and reducing mean time to detect (MTTD) simulated incidents by 40%.
- Performed structured alert triage and escalation following SOC Tier 1 incident response lifecycle (Identification, Analysis, Containment, Escalation).
- Tools: Splunk SIEM, Ubuntu Server, Windows 10, Kali Linux, Hydra, Nmap, VirtualBox

AI-Enhanced Active Directory SOC Lab | *Detection Engineering Project* | 2024

- Deployed a Windows Server 2019 Domain Controller with Windows 10 client in a virtualized lab to simulate enterprise Active Directory environments.
- Integrated Splunk SIEM for centralized log collection and security monitoring across domain-joined endpoints.
- Analyzed 3 key Windows authentication event IDs (4624 - Successful Logon, 4625 - Failed Logon, 4769 - Kerberos Ticket Request) to detect brute-force attacks and credential abuse.
- Mapped 8 detection use cases to MITRE ATT&CK techniques including T1110 (Brute Force), T1078 (Valid Accounts), T1021(Remote Services), T1068(Exploitation for Privilege Escalation), T1098(Account Manipulation).
- Documented all incidents using structured SOC reporting format aligned with industry ITSM workflows.
- Technologies: Active Directory, Windows Event Logs, Splunk SPL, SIEM, MITRE ATT&CK, VirtualBox

EXPERIENCE

Cyber Security Analyst (Virtual Job Simulation) | *Deloitte Australia* | 2024

- Analyzed web server logs to identify patterns of suspicious activity including unauthorized access attempts and anomalous traffic.
- Investigated a simulated cybersecurity breach scenario, performed root cause analysis, and documented findings in a structured incident report.
- Applied threat intelligence and log correlation techniques to distinguish false positives from genuine security incidents.

Security Awareness Analyst (Virtual Simulation) | *Mastercard* | 2024

- Identified and analyzed phishing email samples, classifying threat types and evaluating potential organizational impact.
- Proposed targeted security awareness training improvements to reduce employee susceptibility to social engineering attacks.

Identity & Access Management Analyst (Virtual Simulation) | *Tata Consultancy Services (TCS)* | 2024

- Worked through IAM scenarios involving user provisioning, access control review, and least-privilege enforcement.
- Delivered structured documentation and analysis aligned with enterprise IAM best practices and compliance requirements.

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Coursera (2024)
- Pre Security & Cyber Security 101 — TryHackMe (2024)
- Ethical Hacking — NPTEL (2024)

EDUCATION

Bachelor of Computer Applications (BCA)

Delhi Skill and Entrepreneurship University (DSEU) | CGPA: 7.51 | Expected Graduation: 2026

LEADERSHIP & EXTRACURRICULAR

Vice President | *Astitva Cultural Society, DSEU* | 2024 – 2025

- Led planning and execution of 3+ large-scale college events with 500+ attendees, managing logistics, budgeting, and cross-functional team coordination.
- Developed crisis management, stakeholder communication, and team leadership skills applicable to high-pressure SOC environments.
