

TUSHAR KUMAR SWAMI

SOC Analyst | Cybersecurity

9310020457 | tusharswami2004@gmail.com | New Delhi, India [LinkedIn](#) | [Web Portfolio](#)

PROFESSIONAL SUMMARY

Cybersecurity graduate and entry-level SOC Analyst with hands-on experience building and monitoring SIEM environments (Splunk), analyzing Windows Event Logs, and triaging authentication-based attacks. Comfortable across Windows and Linux, with working knowledge of IP networking, Active Directory, and scripting in Python and Bash. Trained in SOC Tier 1 workflows — alert validation, incident identification, escalation, and documentation — and looking to bring proactive monitoring and incident-support skills to a global Service Operations team. Ready to work in a 24x7 rotational SOC

CORE SKILLS

Monitoring & Log Analysis: Splunk (SPL queries, dashboards, alert tuning), Windows Event Log Monitoring, SIEM Alert Triage, Log Correlation

Incident Response: SOC Tier 1 Operations, Alert Validation, Incident Identification & Escalation, Runbook/Playbook Execution, Threat Documentation

Scripting & Automation: Python (scripting & automation), Bash Scripting, C/C++, HTML

Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, VPN, Ports & Protocols, Network Security Monitoring

Systems: Windows Server, Active Directory, Linux (Kali, Ubuntu Server), Authentication Event Monitoring, IAM Principles

Security Tools: Kali Linux, Nmap, Hydra, Wireshark, Burp Suite, Metasploit (basic), VirtualBox

Threat Detection: MITRE ATT&CK Mapping, Brute-Force Detection, Vulnerability Assessment, Basic Threat Hunting, IDS/IPS Concepts

EXPERIENCE

Cyber Security Analyst — Virtual Job Simulation

Deloitte Australia | 2025

- Analyzed web server logs to identify unauthorized access attempts and anomalous traffic, in line with proactive incident monitoring practices.
- Investigated a simulated security breach, performed root cause analysis, and documented findings in a structured incident report following an incident-handling workflow, applying threat intelligence and log correlation to separate false positives from genuine incidents.

Security Awareness Analyst — Virtual Simulation

Mastercard | 2026

- Identified and analyzed phishing email samples, classifying threat types and evaluating potential organizational impact.
- Proposed targeted security awareness training improvements to reduce employee susceptibility to social engineering attacks.

Identity & Access Management Analyst — Virtual Simulation

Tata Consultancy Services (TCS) | 2026

- Worked through IAM scenarios involving user provisioning, access control review, and least-privilege enforcement.
- Delivered structured documentation and analysis aligned with enterprise IAM best practices and compliance requirements.

PROJECTS

Real-Time Cyber Attack Detection using Splunk SIEM — Personal Project | 2026

- Built a virtual lab (Windows 10, Kali Linux, Ubuntu Server) with Splunk SIEM for centralized log monitoring, and wrote SPL queries to detect failed logins (Event ID 4625) and brute-force activity.
- Simulated attacks with Hydra and Nmap to generate log data, built monitoring dashboards, and performed alert triage following a SOC identification → analysis → escalation workflow.

Active Directory Security Monitoring Lab — Detection Project | 2026

- Deployed a Windows Server 2019 Domain Controller with Splunk SIEM to simulate and centrally monitor an enterprise Active Directory environment; analyzed key authentication event IDs (4624, 4625, 4769) to detect brute-force attacks and credential abuse.
- Mapped 8 detection use cases to MITRE ATT&CK techniques (T1110, T1078, T1021, T1068, T1098) and documented findings in a structured SOC report format.

EDUCATION

Bachelor of Computer Applications (BCA)(2026)

Delhi Skill and Entrepreneurship University (DSEU)

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Coursera (2024)
- Pre Security & Cyber Security 101 — TryHackMe (2025)
- Ethical Hacking (IIT Kharagpur) — NPTEL (2025)

LEADERSHIP & EXTRACURRICULAR

Vice President — Astitva Cultural Society, DSEU | 2024 – 2025

- Led planning and execution of 3+ large-scale events (500+ attendees), managing logistics and cross-functional coordination — building crisis-management and stakeholder-communication skills relevant to high-pressure operations.
